

” THERE IS NOTHING FUNNY ABOUT DNA SEQUENCING

LABCARD

10 SECOND OVERVIEW

- » DNA sequencing service for all kind of sample material submitted in tubes or plates
- » Free sample pick up via DropBoxes
- » Data delivery within hours (incl. NightXpress)
- » High quality read lengths of up to 1100 bases
- » Storage of DNA and synthesised primers
- » Secure data download and archiving of files

” CUSTOM DNA SEQUENCING

Discover Top Quality and Highest Flexibility

DISCOVER ALL DETAILS
OF OUR SANGER PORTFOLIO
BEHIND THE QR CODE.

DID YOU KNOW THAT...

...in 1977 Frederick Sanger introduced the dideoxy chain-termination method today known as „Sanger sequencing“

... Sanger and Gilbert had to share half of the Chemistry Nobel Prize in 1980

... the Human Genome Project was initiated in 1990 and took 15 years

... Eurofins Genomics was analysing more than 6 million DNA samples by Sanger sequencing in 2018

BUILT FOR YOU

Flexible solutions for each requirement

FLEXIBLE OPTIONS FOR TUBE AND PLATE SEQUENCING DEMANDS

TubeSeq Service & SupremeRun Tube
PlateSeq Service & SupremeRun Plate

- For all type of sample material
- Storage of DNA and primers
- Primers can be enclosed or ordered for synthesis
- More than 80 standard primers for free
- Multiple reactions per sample possible
- Free repetition in case of technical failure
- Special conditions for difficult samples
- Easy re-ordering from stored samples
- Prepayment option with barcode labels and PlateSeq Kits

BUILD YOUR OWN

High speed, low price

CONVENIENT SOLUTIONS FOR PREMIXED SAMPLES IN TUBES AND PLATES

Mix2Seq

- One Mix2Seq Kit contains 96 prepaid single reactions
- Tubes of the Mix2Seq Kit can be shared with others
- Any amount of tubes will be processed – no online ordering necessary
- Sequencing overnight with the Mix2Seq Kit – ON

LightRun

- The LightRun offers light-speed sequencing of purified plasmids or PCR fragments already containing the sequencing primer – at a light price.
- Prepaid barcodes are available for tubes and plates for 48 and 96 samples.
- Option for overnight sequencing with the LightRun NXP
